## Template 4 – W[O]RLD – Organization

Organization is basically trying to understand the governance, order or power structure of a situation that you are in.

It can be very useful for work situation or for political situations and so on.

So, who's on top? Who are the middle people, like managers, and who may be the ones at the bottom, like employees or citizens and so on?

As I said, it could be very useful, and it's sometime not understood or misunderstood in trying to get some clarity about the specific work situation, so it can be very useful to look at it in more detail.
